

## **CheckLight technology will help protect drinking water safety of the largest municipality in China**

**Tel Aviv, Israel - June 12, 2009** - CheckLight Ltd., a provider of innovative bioluminescence-based solutions for rapid water quality testing announced today that its technology was chosen to ensure drinking water safety of Chongqing, the largest and most populated municipality in China (over 32 million people).

CheckLight's ToxScreen technology was selected by the local environmental monitoring agency, after an extensive evaluation process, in which different international technologies competed to meet the Agency's strict requirements. As part of a hundreds of thousands dollar project. CheckLight's products will be used to warn against water contamination emergencies throughout the municipality,

"The Chongqing bid is another step in the Chinese government program of building up a nation wide environmental protection network, which once completed will be the most advanced in the world", says Mr. Moti Blau, CheckLight's VP marketing and direct manager of the Asian market, "We believe that this bid proves, yet again, CheckLight's ability to play an important role in that program and contribute to its success" added Blau.

### **About CheckLight**

Founded in 2001 by Dr. Nirit Ulitzur, CheckLight Ltd. is a private company, based in Israel. Since its foundation, CheckLight has engaged extensively in developing and marketing technologies for a variety of water quality testing applications.

In early 2008 Whitewater Technologies Group ([www.w-water.com](http://www.w-water.com)), a leading Israeli water technologies company, became a strategic investor in CheckLight.

CheckLight's products are being successfully used by China's Environmental Protection Ministry, leading water labs in Europe, the Israeli National Water company, and others around the globe.
