

White Water Group increases its holding in CheckLight by investing additional \$500K

Tel Aviv, Israel, June 18, 2009 - CheckLight Ltd, a provider of innovative bioluminescence-based solutions for rapid water quality testing and online monitoring, announced today that its share holder – the Whitewater Technology Group, has increased its investment in the company.

Whitewater exercised its option to increase its holding in CheckLight by an additional investment of \$500K after the company met the pre-defined business milestones.

"We have decided to increase our holdings in CheckLight after we saw the continuous improvement of the company's operations", says Mr. Ori Yogev, Chairman of Whitewater Technologies Group. "CheckLight is taking big steps in the right directions in both technological advancement and sales channels expansion" added Yogev, "I am very optimistic about the company's ability to meet its challenging business targets".

"The additional investment, especially in light of the global downturn, is a vote of confidence from our share holder ", says Mr. Eyal Mor, CheckLight CEO. "We intend to use the funds to launch our new product - Continuous Contamination Bio-monitor (CCB), and continue operating in the territories where this solution has a clear and promising potential".

About CheckLight

Founded in 2001 by Dr. Nirit Ulitzur, CheckLight Ltd. is a private company, based in Israel. Since its foundation CheckLight has engaged extensively in developing and marketing technologies for drinking water quality testing applications.

In early 2008 Whitewater (www.w-water.com), a leading Israeli water technologies company, has become a strategic investor in CheckLight.

CheckLight's products are being successfully used by China's Environmental Protection Ministry, leading water labs in Europe and North America, the Israeli National Water company, and more.

About Whitewater technology Group.
